

EXPERIMENT-01

Aim:

To create, verify, and analyse a forensic image using FTK Imager.

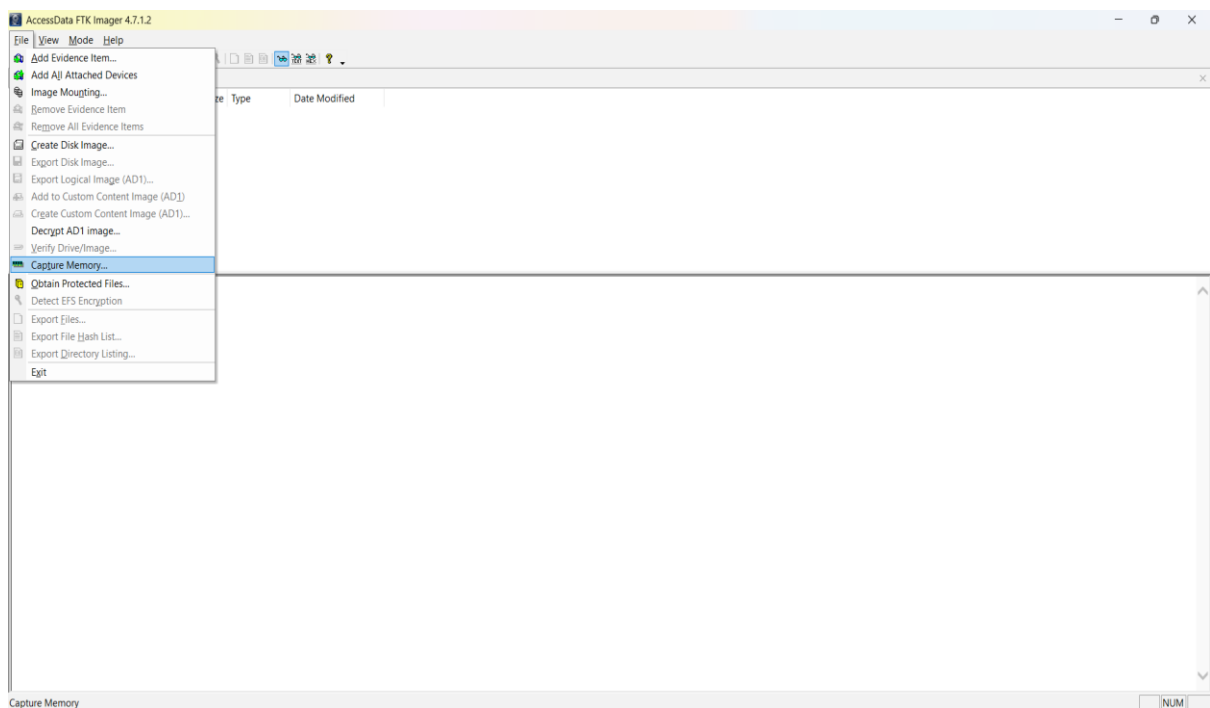

Tools Used:

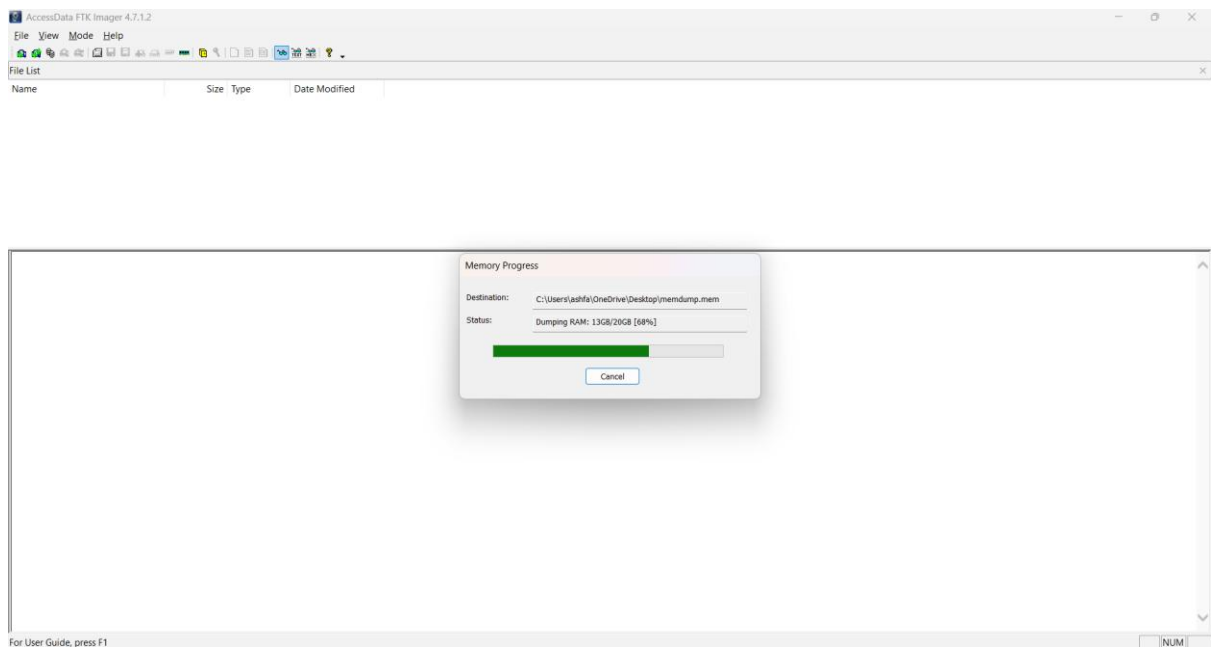

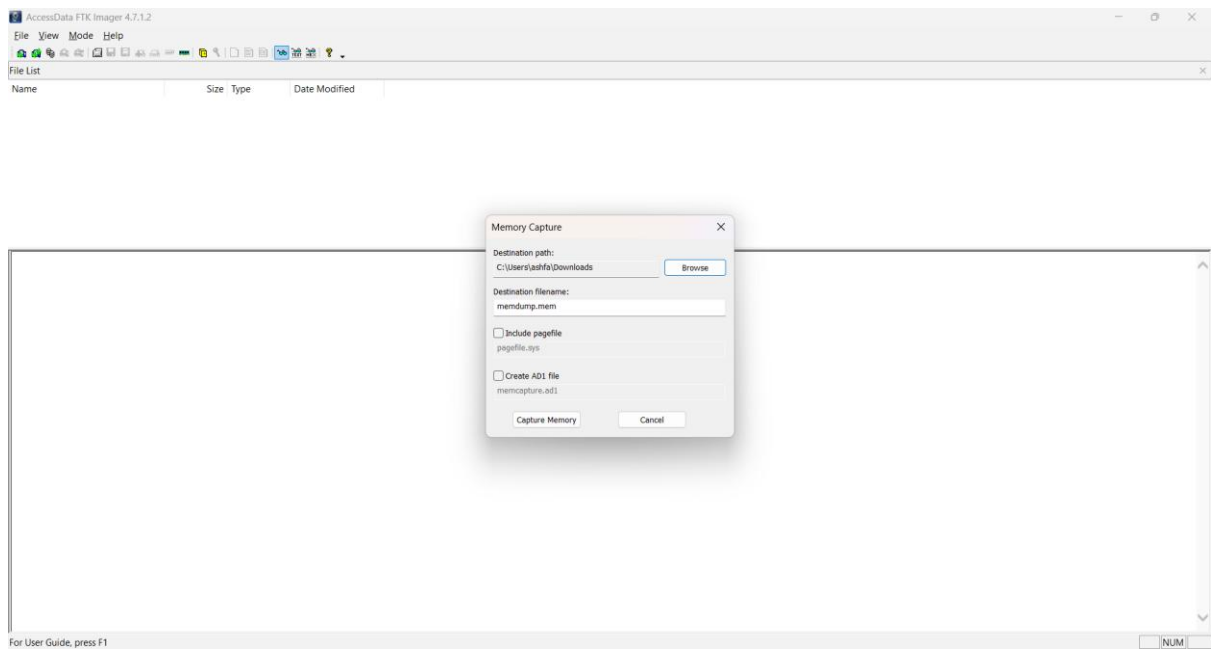

- FTK Imager
- Windows Operating System

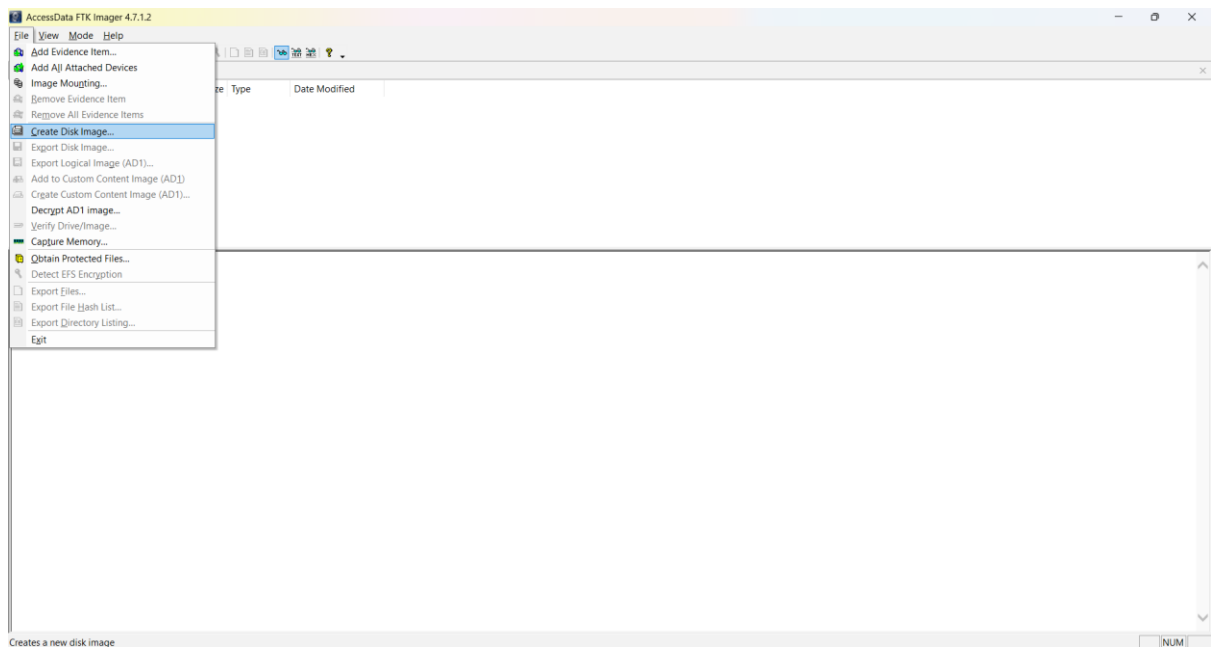

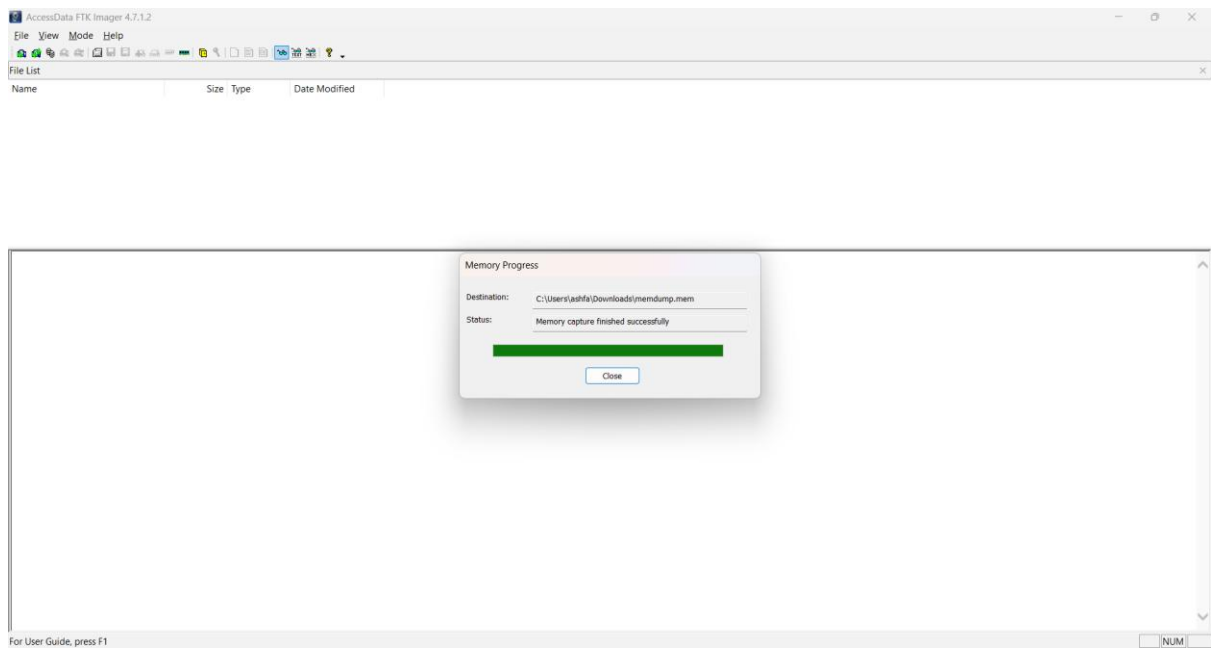

Procedure:

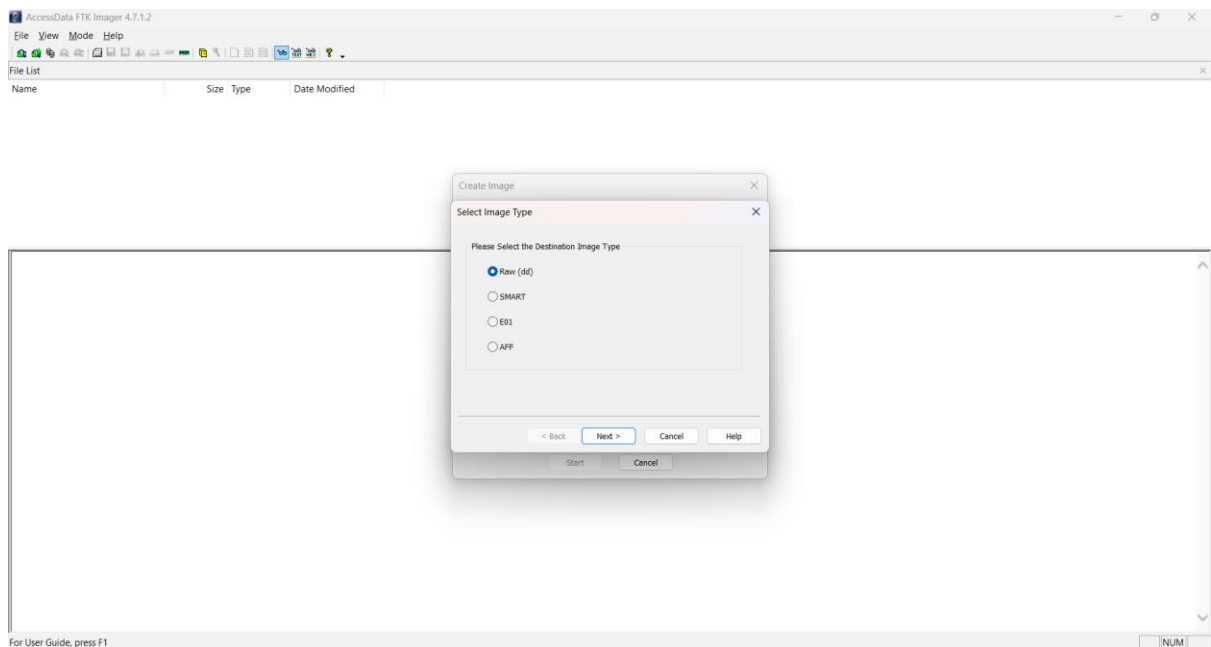

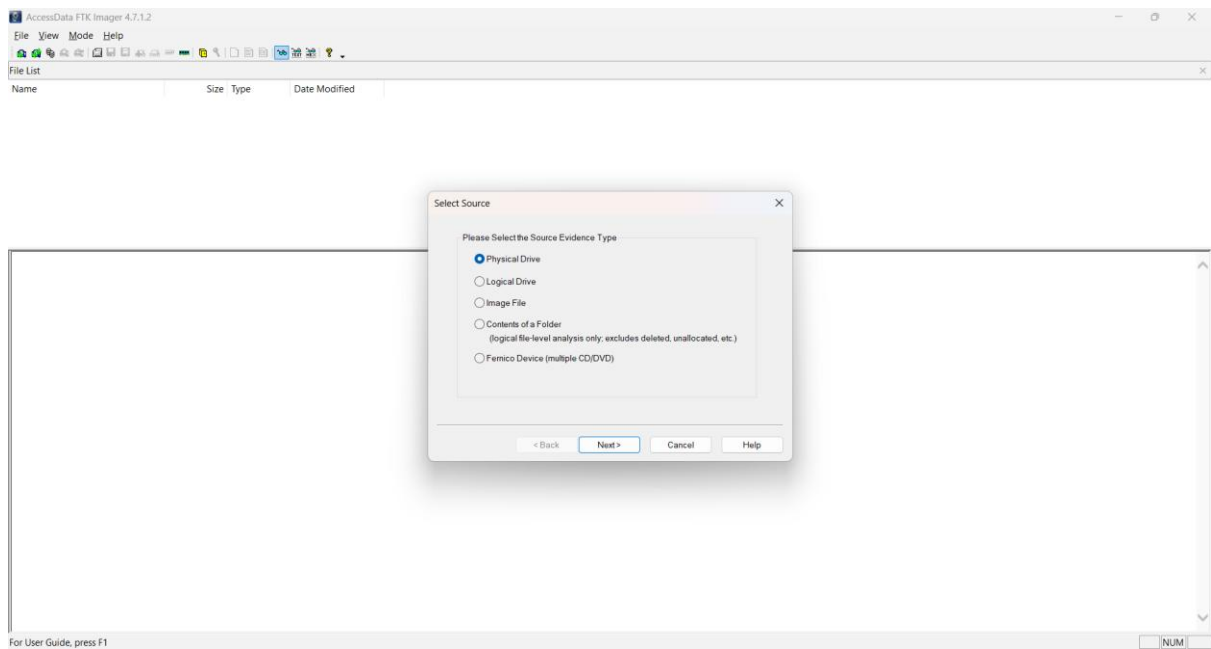

1. Open FTK Imager and choose Create Disk Image.
2. Select Contents of a Folder as the source.
3. Choose a folder and set the destination path for saving the image.
4. FTK generates the image file along with hash values.
5. Verify the image using Verify Image option.
6. Add the image as evidence and explore its contents.

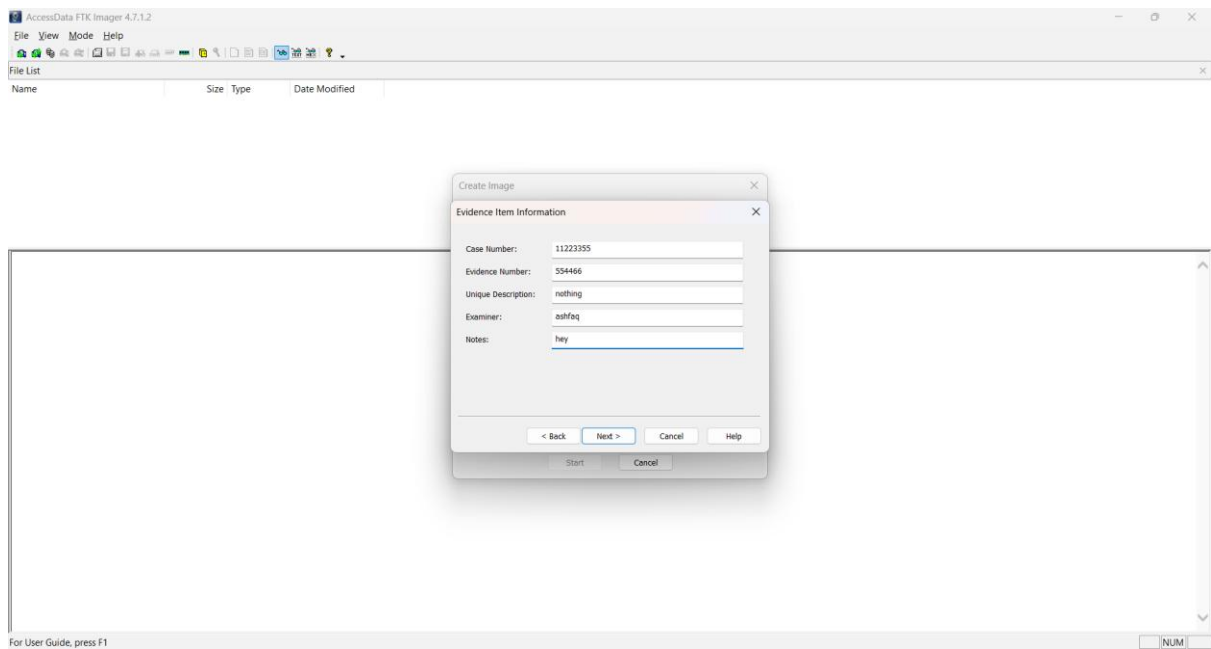

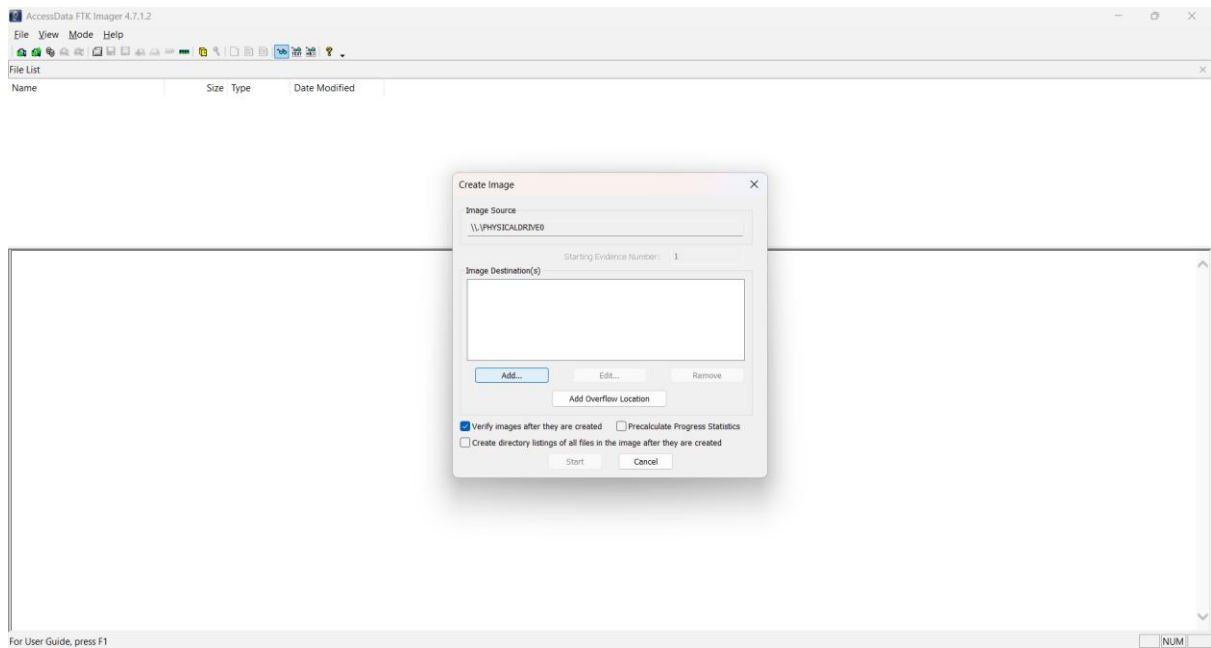

Outputs:

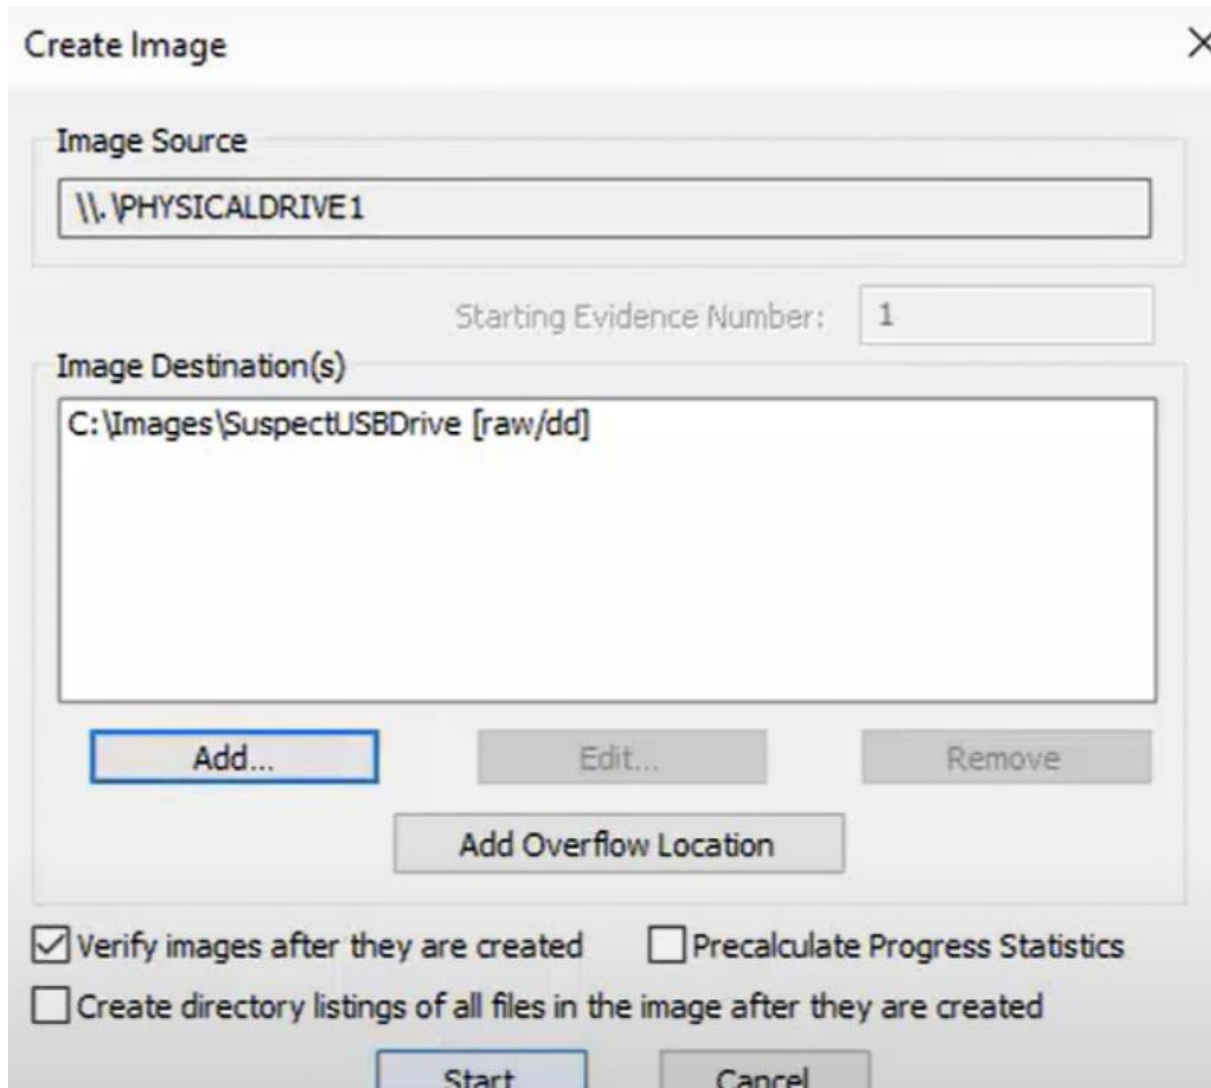

Result:

A forensic image of the selected folder was successfully created, verified, and analysed using FTK Imager. The experiment demonstrated the process of evidence acquisition and integrity verification in digital forensics.
